

Help Shape the Future of **Lung Health Technology**

CALL FOR PARTICIPANTS!

HERON

HEalth Technology for Chronic Respiratory Disease:
Exploring and Mapping Unmet Needs

The HERON project aims to identify the **most pressing unmet needs** and explore **how new technologies can better support people** at high risk of or living with **chronic lung diseases** and their carers.

Do you...?

- **Live with a chronic lung condition**
(such as asthma, COPD, pulmonary fibrosis and others)
- Believe you **might be living with a lung condition based on symptoms or tests**
- Think you **may be at high risk** of developing a lung condition (e.g. due to smoking, housing, family history)
- **Care for someone** with a chronic lung condition

Take the patient/carer survey to tell us about your biggest challenges and views on how technology could help!

SCAN ME

- Takes 15-30 mins
- No tech skills needed
- Anonymous unless you choose to share your contact details

If you have any questions about the project or participating, please contact our team at heron@phc.ox.ac.uk or on **08082 524539**

Are you a health or care professional

caring for adults and children living with, or at risk of, **chronic lung disease?**

Take the professionals survey to tell us about your biggest challenges caring for people with chronic lung diseases and views on how technology could help!

Open to professionals working across all

- **care settings** (e.g. primary/secondary/community care, rehabilitation, smoking cessation services)
- **disciplines** (e.g. GPs, respiratory specialists, practice or specialist nurses, physiotherapists, pharmacists, social care workers)
- **stages of the patient journey** (e.g. screening, diagnosis, management, palliative care).
